Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, May, 1962. Washington 25, D. C. August, 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

IMPORTS OF UNREFINED COPPER FOR REFINING AND EXPORT OMITTED FROM THE MAY 1962 STATISTICS

As a result of processing errors, the following transactions were inadvertently omitted from the May 1962 import statistics:

Schedule A No. 6401 700 - Copper, unrefined, for refining and export

Country of origin	Pounds (copper content)	Dollar value
Mexico	3,704,964	1,051,420
Peru	7,675,316	2,263,421
Chile	33,715,773	10,197,626
S. Africa	524,974	156,081
Total	45,621,027	13,668,548

Arrangements have been made to include these data in the errata section of the June 1962 issue of Report No. FT 110.

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS

Special reports contracted for on a cost basis are listed in current publications so that all users of foreign trade statistics may be informed of the type of reports being prepared and the cost involved. These special reports cover foreign trade data in greater detail or in different arrangement than that available in the regularly published statistics, or supply at an early date information which will be published later. The entire cost of the special work required to compile or duplicate the information from the basic data available in the Bureau is charged to the subscriber.

The reports listed below are those which have been initiated since the last published list, covering statistics related to data shown in this report. Special reports covering statistics related to other types of foreign trade data, are listed in the current foreign trade reports covering such data. Reports previously contracted for are listed in earlier issues of this report, or in issues of the Foreign Trade Statistics Notes (published through the August 1960 issue and now discontinued.) Additional subscribers may purchase any special reports listed in any issue. The maximum payment required in each case will be at the rate shown in the list. Unless otherwise indicated, the prices listed cover subscriptions through the end of the calendar year. Where the period covered is less than a full calendar year, the actual periods covered is indicated. When more than one user subscribes to one of these reports at the beginning of a calendar year, the cost is pro-rated among all subscribers. If a new subscriber requests the report during the calendar year, the cost to him in most cases is the same as the cost to each original subscriber. Cost-sharing arrangements with the original subscribers are sometimes suggested in some cases when the report is a costly one. Information furnished on a cost basis usually will not be publicly released by the Bureau without charge or at a reduced rate until after six months, but exceptions are made in the case of data which the Bureau regards as of general interest.

Subscribers who are interested in information which is not obtainable from the regularly published foreign trade statistics reports, and not listed as a special report, may inquire as to the possibility of obtaining the desired information and request a cost estimate for initiating a new special report. The Bureau's policy with regard to services furnished at cost is described more fully in an article entitled "Policy in Regard to Release of Foreign Trade and Shipping Statistics Reports Prepared for Private Organizations on a Cost Basis" in the April 1958 issue of the Notes. Reprints describing these policies are available upon request to the Foreign Trade Division, Bureau of the Census, Washington 25, D. C. Inquiries regarding the possibility of obtaining unpublished data, or requests for copies of existing special reports, should also be addressed to that Division.

SPECIAL MONTHLY REPORTS FOR 1962

FT 7046 United States Imports of Tapioca, Tapioca Flour, and Cassava (Schedule A Commodity Number 1228 000) for Consumption by Country of Origin. Advance data. *Price per year per subscriber $50.*

FT 8053 United States Imports for Consumption and General Imports of Crude Sodium Sulphate (Salt Cake), Anhydrous Sodium Sulphate, and Crystallized Sodium Sulphate (Glauber Salt) (Schedule A Commodity Numbers 8335 000-8336 500), Commodity by Country of Origin by Customs District of Entry. (Photocopies of Extracts from Machine Tabulation IM-145). *Price per year per subscriber $50.*

FT 8064 United States Imports for Consumption and General Imports of Diamonds (Schedule A Commodity numbers 5950 000-5952 800), Commodity by Country of Origin by Customs District of Entry. (Photocopies of Extracts from Machine Tabulation IM-145). *Price per year per subscriber $85.*

FT 8084 United States Imports of Dates (Schedule A Commodity Numbers 1322 000, 1322 200, 1322 300 and 1322 900) Commodity by Type of Transaction by Country of Origin. *Price per year per subscriber $80.*

FT 8087 United States Imports of Asbestos Cement Pipe and Fittings (Schedule A Commodity Number 5520 060) for Consumption, Country of Origin by Customs District by Port of Entry. *Price per year per subscriber $50.*

FT 9060 United States Imports of Ammonium Persulfate, Potassium Persulfate, and Sodium Perborate (included in Schedule A numbers 8243 800, 8330 900, and 8350 600) for Consumption. Quarterly. Commodity totals. *Price per year per subscriber $740.*

REPORTS FOR SPECIFIED PERIODS

United States Imports for Consumption and General Imports of Certain Glass (Schedule A Commodity Numbers 5200 400-5220 225), Commodity by Unit Control by Country of Origin by Customs District by Rate Provision by Type. Calendar Year 1961. *Price per subscriber $85.*

United States Imports of Merchandise for Consumption and General Imports of Merchandise into the Customs Districts of San Francisco, Oregon, Washington, Alaska, Hawaii and Colorado. (Extracts from Machine Tabulation IQ-253). Calendar Year 1961. *Price per subscriber $220.*

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth" and "Manganese ore," Schedule A commodity numbers 3048 200-3068 950 and 6211 000-6211 300, respectively)]

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of sampling procedure.)

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, June 1962. Washington 25, D. C. August 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page six of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth" and "Manganese ore," Schedule A commodity numbers 3048 200-3068 950 and 6211 000-6211 300, respectively)]

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, July, 1962. Washington 25, D. C. October, 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

---

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth" and "Manganese ore," Schedule A commodity numbers 3048 200-3068 950 and 6211 000-6211 300, respectively)]

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, August, 1962. Washington 25, D. C. October, 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

PUBLICATION OF UNITED STATES IMPORT AND EXPORT STATISTICS IN TERMS OF THE 177 THREE-DIGIT SITC (STANDARD INTERNATIONAL TRADE CLASSIFICATION) COMMODITY GROUPS

Effective with the statistics for January 1963, the existing presentation in the monthly and annual issues of Report Nos. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin; FT 120 United States Imports of Merchandise for Consumption, Country of Origin by Subgroup; FT 410, United States Exports of Domestic and Foreign Merchandise, Commodity by Country of Destination; and FT 420, United States Exports of Domestic and Foreign Merchandise, Country of Destination by Subgroup, will be changed as follows:

1. Report No. FT 110 Commodity by Country of Origin will be prepared showing the commodity data in terms of the 177 three-digit commodity groupings of the U.N. Standard International Trade Classification (SITC) with a further segregation by the new Tariff Nomenclature recently enacted by Congress. The title of the new nomenclature including the additional statistical breakdowns will be Tariff Schedules of the United States Annotated for statistical purposes, TSUSA.

2. Report No. FT 120 will present data on a Country of Origin by three-digit SITC Commodity Group basis.

3. Report No. FT 410 will be prepared showing data for the 177 three-digit SITC commodity Groups by the present (1958 as now revised) Schedule B Commodity by Country of Destination.

4. Report No. FT 420 will present data on a Country of Destination by three-digit SITC Commodity Group basis.

In addition, the directly affected reference tabulations (Such as IM 145, IM 153, EM 522, EM 563, etc.) and releases or publications will be modified accordingly.

Along with the publication of the January 1963 data we will provide all recipients of the above publications with an index showing under what three-digit SITC group each detailed commodity number (TSUSA and Schedule B) is located and a table showing what detailed commodities are grouped under each three-digit SITC group. Moreover, in order to provide users of the statistics with data for 1962 on a comparable three-digit SITC Commodity Group basis with 1963 data, a special publication will be transmitted to all recipients of the regular Foreign Trade Import and Export publications, presenting 1962 monthly data in the following arrangements:

1. Imports
   a. Three-digit SITC Commodity Group by Country of Origin
   b. Country of Origin by three-digit SITC Commodity Group

2. Exports
   a. Three-digit SITC Commodity Group by Country of Destination
   b. Country of Destination by three-digit SITC Commodity Group

The special publication presenting 1962 monthly SITC data will be released prior to or at the same time as the January 1963 statistics are released. In addition, monthly reference tabulations for the year 1962 will be prepared for imports on a three-digit SITC Commodity Group by Schedule A Commodity by Country of Origin basis. For annual import data for 1962, it is planned to prepare tabulations on a three-digit SITC Commodity Group by estimated TSUSA by Country of Origin arrangement and Country of Origin by SITC three-digit Commodity Group arrangement.

For exports, reference tabulations presenting monthly and annual data for 1962 will be prepared in terms of three-digit SITC Commodity Group by Schedule B Commodity by Country of Destination arrangement, and Country of Destination by three-digit SITC Commodity Group arrangement. The monthly reference tabulations will be scheduled so that data for any month from 1962 will be available no later than when the data for the comparable month of 1963 are released and if possible all months will be made available by the time the January 1963 data are released or as soon thereafter as feasible.

The preparation of annual data on a three-digit SITC basis for earlier years and the timing as to its availability is under consideration and an announcement will be made in a future issue of this publication.

CERTAIN IMPORT TABULATIONS BY SUMMARY COMMODITY GROUPINGS DISCONTINUED

It was announced in the April-May 1960 issue of Foreign Trade Statistics Notes that machine tabulations presenting data on United States exports and imports by certain summary commodity groupings, i.e., grouped by similarity of physical condition or type, worked out by the Bureau of Foreign Commerce (now Bureau of International Programs), and grouped by "end use", worked out by the Office of Business Economics, cross classified by eight mutually exclusive and thirty selected areas and countries would be prepared starting with the statistics for January 1960. Recently it has been determined that the summary data on United States imports grouped by similarity of physical condition or type and presented in machine tabulations IM 170, IQ 270, and IA 270 are no longer needed by the Bureau of International Programs. Therefore, preparation of these tabulations has been discontinued. The last issues of the tabulations, which were released for public reference, are as follows:

IM 170 - June 1962
IQ 270 - Second quarter 1962
IA 270 - Calendar year 1961

However, preparation of tabulations presenting summary data on United States exports grouped by similarity or physical condition or type and presented in EM 570, EQ 670, and EA 670 will be continued. Also, the preparation of summary data on United States imports and exports grouped by "end use" and presented in machine tabulations IM 171, IQ 271, and IA 271 (for imports) and EM 571, EQ 671, and EA 671 (for exports) will be continued.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity information is summarized according to the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, and is presented in the order of the numbered classifications in that Schedule. The Imports of Merchandise for Consumption by Subgroup table on page of this report indicates the range of Schedule A commodity numbers covering related subgroups of commodities and will assist in locating in the report the statistics for particular commodities. For precise definition of the individual commodity classifications for which figures are presented, reference should be made to Schedule A. The commodity descriptions in this report are necessarily abbreviated to save printing

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. The omission of a Schedule A commodity classification from this report indicates no imports of that commodity valued at more than $100 reported on formal entries.

Except for commodity number 9999 500, the Schedule A commodity classifications in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are included in the over-all import totals and in the group 9 total in this report. The estimates are also included in the totals for individual countries and in the totals for economic class as published in Reports FT 950 and FT 120.[3] The estimates are shown by country, under commodity number 9999 500 in this report. Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

As of possible further assistance in estimating the effect of this handling of small shipments, studies have shown that the undercounting for any individual commodity subgroup total is probably no more than about five percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. (Estimated commodity data for the small shipments in 1957 are shown in a supplement to calendar year 1958 Report No. FT-110.) It is estimated that commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The handling of low-valued imports described above has been in effect in the import statistics since January 1958.

Descriptions of the Special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Effective January 1960, the initial reporting of imports is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D. Annotated attempts to minimize the difficulty of cross-classification between the tarrif and statistical reporting requirements.

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are being excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity only commodity classifications being excluded from the statistics are being compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D. C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A

[3] See Report No. FT 930-I for the handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by Sub-group.

commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[4] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

[4] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports is included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g. "Cotton cloth" and "Manganese ore," Schedule A commodity numbers 3048 200-3068 950 and 6211 000-6211 300, respectively)]

481	Sawmill products (lumber)	4103100-4207555	52	34,492,576
490	Wood manufactures	4208000-4280990	52	22,396,534

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Page number	Value (dollars)
	GROUP 4—WOOD AND PAPER—Continued			
500	Cork and manufactures	4300000-4321900	54	588,973
